**Year 2009 SEBASE Annual Maintenance Audit**

Congratulations - you have successfully met the SAFE Companies annual maintenance audit standard for small companies. Your certification number remains 5070080.

Your next audit timeline is:

Audit	Audit Submission Date
2010 Recertification due date	Apr 24, 2010

Please submit your audits according to the timeline above to maintain you SAFE certification status and/or COR rebate eligibility. You should submit your recertification audit at least 4 weeks prior to your certificate expiry date to avoid a lapse in your SAFE certification.

We will notify WorkSafeBC of your current satisfactory SAFE certification status for them to determine COR rebate eligibility.

Enclosed please find the SEBASE Audit Review recently conducted by the SAFE Companies Quality Assurance Team. After review, your score was 24 points out of a possible 27 points based on the Employer with and Contractors criteria.

Detailed results, recommendations, notes and suggestions for continual improvement are provided for your review. The notes and continual improvement suggestions that the reviewers added are issues that did not affect scoring for this audit.

A key belief of the Forest Safety Accord is the commitment to continual improvement. Please include a copy of your Corrective Action Log entries for the deficiencies identified in the attached Review with your next audit submission to show continual improvement.

If you have any questions please contact the Quality Assurance Team in our Nanaimo office. Thank you for your commitment to safety and participation in the SAFE Companies program.
